FYI again.
I like your comments as to how we should organize. Debbie - this is for you because you are the interface on ingredients, Robin -this is a USA issue.
Richard - I need your input on this.

I think this is outside the manufacturing issue. There are overlaps with what we do (ie effect of ingredients on nicotine transfer)but the central FDA question here is fairly simple and more within Solana's area. I see many functions playing a role in the relations but I also see much overlap and the need for a central clearing house for information that is supplied.
Otherwise, we are going to have a big mess on our hands.

Hope you have a safe and happy move to Richmond.
I also hope the whole family "takes to" the area. Please give them my best.

I noticed you were not copied on this note. When you are back, we should use this potential issue as starting point for our discussion of the right approach to FDA scientific policy issues.

By the way, I closed on my house Friday so I guess I am now a Richmonder.
